Foreign Characters

and Other Symbols

Inserting Foreign Characters
and Other Symbols

This document is to explain the process of inserting accented letters, such as *café* or *señorita*, or to enter the copyright symbol, when using the standard U.S. keyboard layout.

The general process to insert accented characters or symbols is:

1. First, press the appropriate CTRL command on the keyboard. This initiates the accent, although nothing is displayed.
2. Next, press the letter you wish to have accented.

[*] When typing in other languages, accented letters are usually handled directly by the Windows keyboard layout and do not use the methods described here.

Example 1 - Accented Letters

CTRL+SHIFT+TILDE (~) initiates the accent.

Pressing the letter "n" at that point will give the Enye (ñ) character.

Example 2 - Symbols

CTRL+SHIFT+AT_SIGN (@) initiates the accent.

Pressing the letter "c" at that point will give the Copyright (©) symbol.

Pressing the letter "r" at that point will give the Register Trademark (®) symbol.

---

[*] Note: letters in certain European, Slavic, Turk and other alphabets that use diacritic marks are currently not supported in Screenwriter.

Foreign Characters and Symbols Chart
(Keyboard Commands)

Common Vowels						
	a, A	**e, E**	**i, I**	**o, O**	**u, U**	**y, Y**
CTRL+SHIFT+APOSTROPHE (')	á, Á	é, É	í, Í	ó, Ó	ú, Ú	ý, Ý
